The console Reactions when we run the project :

1) Running the server side

```
Console ⊠
TcpServer [Java Application] C:\Program Files\Java\jre1.8.0_121\bin\javaw.exe (30 9:55:53 ,2022 באוג)
Server starting....
Connected ...
Waiting for client message
```

2) Running the client side

```
Console ⊠
TcpClient [Java Application] C:\Program Files\Java\jre1.8.0_121\bin\javaw.exe (30 9:59:19 ,2022 באוג)
Client starting
Connected to server 127.0.0.1:5555
Choose an option
        1. Download File
        2. Upload  File
        3. List Files
        4. Delete File
```

3) Choose the first option :

```
Console ⊠
TcpClient [Java Application] C:\Program Files\Java\jre1.8.0_121\bin\javaw.exe (30 9:59:19 ,2022 באוג)
Connected to server 127.0.0.1:5555
Choose an option
        1. Download File
        2. Upload  File
        3. List Files
        4. Delete File
1
Enter the FileName

server1.txt
request :{"header":{"Action":"download","RequestId":1,"ContentType":"String","filePath":"server1.txt"},"body":" "}
message sent
file downloaded response Code :200
```

4) Choose the second option :

```
Choose an option
        1. Download File
        2. Upload  File
        3. List Files
        4. Delete File
2
Enter the FileName

client1.txt
request :{"header":{"Action":"upload","RequestId":1,"ContentType":"String","filePath":"client1.txt"},"body":"Blade
message sent
file uploaded response Code : 200
```

5) Choose the third option :

Console ✕   ■ ✕ ✕ | ▣ ▣ ▣ ▣ ▣ | ▣ ▣ ▾

TcpClient [Java Application] C:\Program Files\Java\jre1.8.0_121\bin\javaw.exe (30 10:12:59 ,2022 באוג׳)
Client starting
Connected to server 127.0.0.1:5555
Choose an option
        1. Download File
        2. Upload File
        3. List Files
        4. Delete File
3
request :{"header":{"Action":"showFolder","RequestId":1,"ContentType":"String","filePath":"Server Files"},"body":" "}
message sent
Total Files in folder - 6

        +---------+---------------------+
        | Sr No | Filename |
        +---------+---------------------+
        | 1 | 3456.txt |
        | 2 | client1.txt |
        | 3 | new.txt |
        | 4 | server1.txt |
        | 5 | server2.txt |
        | 6 | server3.txt |
        +---------+---------------------+

6) Choose the forth option :

Choose an option
        1. Download File
        2. Upload File
        3. List Files
        4. Delete File
4
Enter the FileName

server1.txt
request :{"header":{"Action":"delete","RequestId":1,"ContentType":"String","filePath":"server1.txt"},"body":" "}
message sent
Deletion successful. response Code : 200
